## DETAILED ACTION

### *Reasons for Allowance*

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention. Specifically, the prior art of record fails to teach or suggest a central specification designating a plurality of cores and interconnections between the cores, generating a software language functional model of the circuit including the cores from the central specification and a set of software models of the cores and generating a hardware description language model of the circuit including the cores from the central specification and a set of hardware description language models of the cores, as recited in independent claims 1, 24, 30, 31, 32, 33 and 36.

The prior art of record, **Hasley** and **Dangelo**, disclosed a central specification describing a circuit. However, they failed to disclose the independent claims as recited, including generating both a software language model and a hardware description language model of the circuit directly from the central specification and the individual software and hardware description language models of the cores.

The closest prior art of record, **Hutchins** et al., "Automating IP Core Design, configuration and Verification", disclosed a centralized specification system for cores. However, it did not disclose generating a software language mode of the circuit and a hardware description language model of the circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled

"Comments on Statement of Reasons for Allowance."

### ***Priority***

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

The later-filed application must be an application for a patent for an invention which is also disclosed in the prior application (the parent or original nonprovisional application or provisional application); the disclosure of the invention in the parent application and in the later-filed application must be sufficient to comply with the requirements of the first paragraph of 35 U.S.C. 112. See *Transco Products, Inc. v. Performance Contracting, Inc.*, 38 F.3d 551, 32 USPQ2d 1077 (Fed. Cir. 1994).

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence(s) of the specification or in an application data sheet by identifying the prior application by application number (37 CFR 1.78(a)(2) and (a)(5)). If the prior application is a non-provisional application, the specific reference must also include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

The priority date will be the filing date of 08 August 2000.
